Enterprises

**Where
Quality Meets
Rotary Valve
Technology.**

MANUFACTURERS OF

ROTARY AIRLOCK VALVE

ABOUT US

We, Mukti Enterprises, under the efficient leadership of Mr. Sagar Hunalli, have the primary aim of delivering optimum satisfaction to our clients and also develop a fruitful, long standing relationship with them. We manufacture and supply Best Quality Rotary Airlock valves which are closest to perfection as far as the quality standards and the specifications of the clients are concerned. We also work on a timed schedule, which are planned well, in order to ensure on time delivery of our product.

OUR PRODUCTS

Rotary Valve

Features:

Long-lasting, low-maintenance, robust design from quality materials, high efficiency, climate-resistant, and varied styles for industrial/commercial use.

Applications:

Food & beverage, pharmaceuticals, chemicals, dosing/mixing, cyclone discharge, pneumatic conveying, and plastics.

Features:

Durable, low air leakage, heavy-duty, compact, easy install/replace, minimal air loss, low maintenance, wear-resistant.

Applications:

Handles diverse materials like food, wood chips, ash, powders, minerals, and chemicals.

Rotary Airlock Valve

Rotary Valve Feeder

Features:

Open/closed rotors, flanged ends, low lubrication, robust design, minimal/no air loss, premium materials, abrasion/corrosion resistant.

Applications:

Pharmaceuticals, chemicals, food/dairy, pet food, agriculture, cement, mining/marine, sugar.

OUR PRODUCTS

Blow Through Rotary Valve

Features:

Minimal air leakage, various models/sizes, pressure/temperature capable, robust/compact, high capacity, easy cleaning, pneumatic discharge.

Applications:

Pneumatic conveying, handling sticky powders (flour, milk powder, etc.), pharmaceuticals, chemicals, food/beverages.

Features:

Tool-less cleaning, slide bars/linear bearings for sanitation, premium materials (SS, MS, CI), increased system productivity.

Applications:

Pharmaceuticals, chemicals, plastics, paints, food/beverages (frequent cleaning), batch mixing.

Quick Clean Rotary Valve

Drop Through Rotary Valve

Features:

Versatile, efficient (low pressure), durable (hardened steel), integrated components, budget-friendly, easy maintenance.

Applications:

Diverse industries (chemical, food, pharma, etc.) for material handling, dosing, and airlock functions.

Features:

Hardened steel (abrasion/corrosion resistant), multi-blade contact, efficient pocket filling, handles various dry powders, robust/compact/lightweight.

Applications:

Feeding and metering bulk dry powders, fly ash, other materials.

Offset Rotary Valve

OUR PRODUCTS

Teflon coated rotary valve

Features:

Corrosion-resistant, low maintenance/cost, high temp/pressure performance, custom-built, abrasion-resistant.

Applications:

Handling corrosive fluids and abrasive materials in chemical, pharmaceutical, and other demanding industries.

Features:

Hand wheel actuated, reliable, low maintenance, efficient, durable, long-lasting.

Applications:

Pharmaceuticals, chemicals, food/beverage, processing plants. Sources and related content

Manual Operated Slide Gate Valve

Motorised Operated Slide Gate Valve

Features:

Electric motor actuated, reliable, low maintenance, efficient, durable, long-lasting.

Applications:

Pharmaceuticals, chemicals, food/beverage, processing plants.

Features:

Pneumatic/hydraulic cylinder actuated, reliable, low maintenance, efficient, durable, long-lasting.

Applications:

Pharmaceuticals, chemicals, food/beverage, processing plants.

Pneumatic Operated Slide Gate Valve

OUR PRODUCTS

Manual Operated
Knife Gate Valve

Features:

Durable, precise, rust/corrosion resistant, high strength/efficiency, reliable.

Global Supply: UK, USA, Canada, Dubai, and many more.

Applications:

Chemical, paper/pulp, mining, cement, refineries, power, wastewater, clamber installations.

Features:

Lightweight, low pressure drop, cost-effective, on/off, easy/cheap actuation.

Applications:

Wastewater, viscous liquids, solids/slurries, heavy oils, dry solids/powders.

Motorised Operated
Knife Gate Valve

Butterfly Type Damper
Valve

Features:

Electric/pneumatic operation, various shapes, simple design, high sealing, flat disc blades (compact/light/fast), abrasion/chemical/corrosion resistant, smooth finish, varied seals, multiple material options (SS, MS, CI), industry standard design.

Applications:

High isolation and flow control in diverse industrial processes.

Features:

Sturdy, durable, 300°C operation, various sizes, low noise/maintenance, minimal power use, 3-phase power.

Applications:

Steam/boiler, dust collection, chemical plants, plastics, power plants, textiles, rolling mills, HVAC, water plants.
